Summary

This is an easy to print cover for busbars to avoid shorts. It has a slot for voltage taps, and clicks onto the busbar.

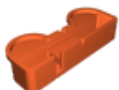

[Hobby & Makers](#) > [Electronics](#)

This is an easy to print cover for busbars to avoid shorts. It covers all metallic surfaces.

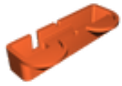

- clicks onto the busbar
- It has a slot for voltage taps (L and R version have slightly different location)
- Has space for 2 mm insulation between cells

You should still put a cover lid on your battery, but it makes working on it a lot less nerve wrecking.
